

## A Whole NEW WORLD

Born on a plantation, Lyptus is one of the most beautiful and functional hardwoods to be introduced into the United States in many years.

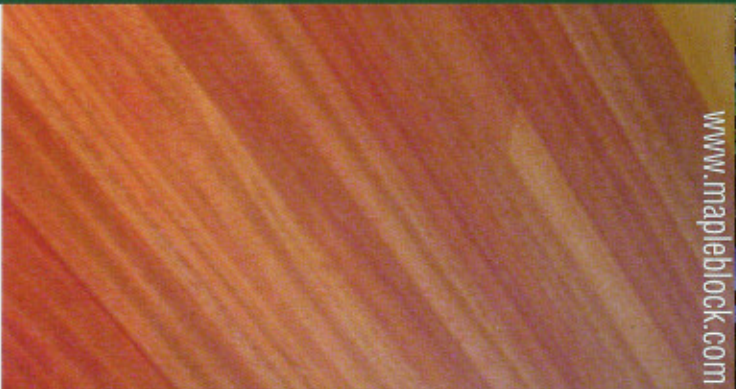

Rich reddish-brown hues suggest the elegance of Mahogany or Cherry but in a renewable natural resource. Phenomenal growth of these trees is constantly being monitored by Weyerhaeuser technicians. Matching growth to harvest permits an endless supply. Now, through an alliance with the WOODWELDED Companies of Michigan Maple and Bally Block, this lovely wood is being offered in Butcher Block. Should you choose to work (counter tops), stand (stair treads) or sit (benches) on this very hard wood, your options are many.
