The Logical Choice

**EASY TO USE CLEAR PROTECTIVE FINISH • NO BRUSHING •
WATER & ALCOHOL RESISTANT • FAST DRYING • LEAD FREE**

RECOMMENDED: For unfinished, new wood surfaces and previously finished wood surfaces that have been stripped and sanded to bare wood. This is a fast drying synthetic oil, formulated to enhance the natural look of hard woods such as Maple, Birch, Rosewood, Pecan Teak, etc. Its basic ingredient is a urethane resin which offers excellent clarity, good moisture resistance and faster drying than natural oils. The dry film is non-toxic and alcohol resistant. It is recommended for use on wooden articles such as salad bowls, chopping boards, forks, etc.

DIRECTIONS FOR USE: Here is a simple foolproof method for applying GOOD STUFF FOR WOOD without runs, sags, etc. to obtain a professional finish on all woods.

SURFACE PREPARATION: On new wood surfaces be sure wood is clean, dry, and well-sanded. Old wood surfaces must be cleaned down to bare wood and free of wax and dust.

APPLICATION:

1. Apply finish with soft rag or paper towel, rubbing into pores of the wood spreading it evenly with a circular motion.
2. Allow the finish to set for 2-3 minutes, then wipe dry with soft rag or paper towel, using straight brisk strokes with the grain. If more finish protection is desired, apply additional coats using straight strokes with the grain.
3. **DRYING TIME:** Air dry at least four hours between coats, depending on humidity and temperature conditions. For best results, allow overnight drying time between coats.

NOTE: When using GOOD STUFF FOR WOOD follow the above procedure to achieve a clean, transparent, satin, patina finish.

CLEAN UP: Use mineral spirits or paint thinner. PROMPTLY DISCARD ALL USED RAGS IN A WATER FILLED CONTAINER. CLOSE CONTAINER AFTER EACH USE.

CAUTIONS: COMBUSTIBLE contains petroleum distillates. Keep away from heat or open flame. Avoid prolonged and repeated contact with skin. Do not get in eyes. Use only in well-ventilated area.

CAUTION: COMBUSTIBLE MATERIAL
HARMFUL OR FATAL IF SWALLOWED
SEE CAUTIONS ON BACK OF CAN

FIRST AID:

If swallowed, DO NOT induce vomiting. Call physician immediately. For skin contact wash with soap and water immediately. Eye contact, flush eyes with plenty of water for at least 15 minutes.

**KEEP OUT OF
REACH OF CHILDREN**

NOTICE:

Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling contents may be harmful or fatal.
